Manufactured Paving Collection

Castacrete manufactured paving has been designed to accommodate a wide variety of tastes whilst making it affordable by all. Styles ranging from traditional through to contemporary, we are confident that we are able to suffice your requirements to create that tranquil and blissful outdoor space. The manufactured paving we offer comes in an array of different colours, sizes and shapes. We have many years of experience in the manufacturing field of decorative concrete products, which has enabled us to produce complementary accompaniments designed to fulfil your desired look.

Autumn Gold

Rutland Pre-Packed Collection

The Rutland Paving Range has been designed to re-create the look of Natural Stone at an inexpensive price. The range is available in three colours as well as a choice of either single sized or pre-packed patio packs. The patio packs have been designed to take the hard work out of working out how much you will need to complete your project. It literally is a "patio in a pack". The patio packs come in three different designed patterns. The multiple sizes in the Oakham, Ryhall and Ashwell pattern packs, create an attractive random layout which are easily linked together to extend to any size area.

Colour	Pre-Packed Pattern	m ² Covered	KG Per Pack
Autumn Gold Mellow Stone	Oakham Pattern	7.2m ²	500
	Consists: 600mm x 600mm x 12 off and 600mm x 300mm x 16 off

Autumn Gold

Mellow Stone

Winter Stone

Autumn Gold - Autumn Gold is a multi-tone autumnal colour which has been achieved using a combination of dark grey and brown. It is more suited when aiming to achieve a warm traditional rustic look.

Mellow Stone - Mellow Stone is a multi-tone stone colour which has been achieved using a combination of buff and brown. It is ideally suited to creating the traditional Cotswold stone look.

Winter Stone - Winter Stone is a multi-tone stone colour which has been achieved using a combination of buff and black. It is ideally suited to creating a more traditional rustic look.

Rutland Paving

Collection

A practical alternative to natural stone Rutland paving is a high profile riven finished decorative concrete paving product. This versatile range available in six individual sizes:- 600mm x 600mm, 600mm x 300mm, 300mm x 300mm, 600mm x 450mm, 450mm x 450mm and 450mm x 300mm, can be used in an array of different ways, to create paths and patios of distinction, regardless of which look you are aiming to achieve whether it be contemporary, traditional or rustic, the versatility enables you to create it. The Rutland range has proven to be immensely popular. Rutland paving is available in three colours, Autumn Gold (multi-coloured dark grey and brown), Winter Stone (multi-coloured buff and black), Mellow Stone (multi-coloured buff and brown).

Colour	Pack/Size Info	KG Per Unit	Pieces Per Pack	KG Per Pack

Old Grey

Courtyard Paving

Collection

Courtyard Paving has been designed to give the appearance of the aged foot-worn flagstones that can be seen today in our city streets and courtyards. Its colour and texture, normally only created through hundreds of years of weathering, is now available to both amateur and professional garden designers. The worn stone effect is versatile enough to add atmosphere to the “old world” cottage garden or the more formal Victorian garden. Courtyard Paving is available in six sizes:- 600mm x 600mm, 600mm x 300mm, 600mm x 450mm, 450mm x 450mm, 450mm x 300mm and 300mm x 300mm. With the addition of pre-packed circles available in two diameters, 1.8m and 2.56m, your patio can be even more eye catching. The Old Grey (grey/green) colour has been designed especially to suit the Courtyard Range.

Colour	Pack/Size Info	KG Per Unit	Pieces Per Pack	KG Per Pack
Old Grey	600mm x 600mm	23.6	33	779
	600mm x 450mm	17.5	33	578
	600mm x 300mm	11.8	66	779
	450mm x 450mm	12	72	864

	300mm x 300mm	5.9	132	779
	Oakham Pattern	7.2m ²		500
	Consists: 600mm x 600mm x 12 off and 600mm x 300mm x 16 off			
	Hambleton	9.0m ²		625
Consists: 600mm x 600mm x 13 off, 600mm x 300mm x 18 off and 300mm x 300mm 12 off				

Old Grey

Old Grey - Old Grey colour is a traditional grey colour that lends itself to the more traditional period property. Due to its versatility it can be used inside or out.

Stone

Traditional Paving

Collection

Traditional paving is available in two solid colours:- Stone and Weathered Grey. Having a simulated stone finish that re-produces the attractive appearance of natural stone with a slightly riven face, this product is predominately used to create the more traditional period look but at a fraction of the cost.

Colour	Pack/Size Info	KG Per Unit	Pieces Per Pack	KG Per Pack
Stone, Weathered Grey	600mm x 450mm	17.5	33	578
	450mm x 450mm	12	72	864
	450mm x 300mm	8.5	66	561
	300mm x 300mm	5.9	132	779

Stone

Weathered Grey

Stone - Traditional Stone resembles the natural look of Cotswold Stone. This muted buff colour lends itself to the creation of a look that you may only expect to see in the picturesque Cotswolds district.

Weathered Grey - Weathered grey has been created to resemble the look of old flag stones of years gone by. You cannot fail to re-create a more traditional period look inside or out.

Natural

Premier Riven Paving

Collection

Premier Riven Paving lends itself to any landscape project. It has a superior riven texture, muted in colour and has virtually straight sides, which enables you to create a more contemporary look by placing them with minimal joints, or the more traditional paved look by making the joints wider. The more muted colours available in the premier riven available in three colours:- Natural, Stone and Dark Grey.

Colour	Pack/Size Info	KG Per Unit	Pieces Per Pack	KG Per Pack
Natural	600mm x 600mm	23.6	33	779
	600mm x 300mm	11.8	66	779
	450mm x 450mm	12	76	912
Stone	600mm x 600mm	23.6	33	779
	600mm x 300mm	11.8	66	779
	450mm x 450mm	12	76	912

Charcoal Riven

Buff - This is a muted solid yellow colour, which is ideally suited to accompany other colours in the range or used on its own to create a traditional Cotswold Stone look.

Natural - This is a solid light grey shade, which is ideal to accompany other colours in the range or used on its own to create a clean crisp contemporary look.

Charcoal - This is a solid dark grey colour. It is ideal to accompany other colours in the range or used on its own to create a clean crisp contemporary look.

Dark Grey

Textured Paving

Collection

Castacretes textured paving is an alternative to the popular riven finished paving. The process to manufacturing textured paving results in a shot blasted surface exposing the limestone aggregate within the product. This process also adds a durable slip resistant feature.

A clean, crisp contemporary look can be achieved using textured paving adding the ever popular stylish modern feel. With having straight sides, this enables you to place the slab side by side without any joints if the contemporary look is being achieved. If a more traditional look is required, then simply add a slight space between each slab, which will accommodate and require finishing off with a jointing product of your choice. The textured paving is available in three sizes and four modern colours:-

Colour	Pack/Size Info	KG Per Unit	Pieces Per Pack	KG Per Pack
Natural	600mm x 600mm	28	33	924
	600mm x 300mm	14	66	924

	225mm x 65mm x 100mm	3.3	285	950

Buff

York

Buff - Buff is a solid colour block. It is light beige/yellow in colour and can be used to create a contemporary modern look. If used in conjunction with another colour, you will be able to achieve a more traditional result.

York Colour - York is a slightly darker golden tone in comparison to more muted buff.

Block Paving Collection

Driveways have traditionally been a statement about your home, albeit because it is the first impression you give to the outside world. Over the years, as with most things, styles and trends have changed. Despite the continuous cycles of change regarding tastes in driveway landscaping, there is a legacy towards concrete block paving that has been passed down from generation to generation. Concrete Block Paving is both practical and affordable to all, and can produce the look that you are aiming to achieve, whether it is traditional or contemporary. Castacrete have been manufacturing driveway blocks for many years, and with time comes experience and knowledge. Our ever increasing knowledge has enabled us and continues to enable us to produce a competitive range of blocks, in an assortment of styles, colours and sizes.

Autumn Gold

Rumbled Block Paving Collection

Rumbled Paving Setts have been developed to enable a look that can only be described as authentic and quaint. Its rumbled and worn characteristics, cannot fail to re-create the cobbled streets image of years gone by. Available in five colours and three sizes, developed with affordability in mind. The versatility of the Rumbled Paving Setts is unquestionable. Regardless of whether you are aiming to achieve the charming country cottage look or the classy yet contemporary vision, these blocks are guaranteed to produce an attractive and captivating finish to any landscaped project.

Pack size will always be 11.52m² but individual quantities may differ.

Autumn Gold - Autumn Gold is a multi-tone colour block that has been created using a selection of warm autumnal colours. Autumn gold is ideally suited for all projects whether it be traditional or modern. Being a multi-tone colour, it also lends itself to being mixed with other colour blocks to create an array of patterns.

Brindle - Brindle is a two tone colour block that has been created using a mixture of red and charcoal. Brindle is and has always been a very popular colour due to the endless possibilities when configuring a pattern.

Charcoal - Charcoal is a solid dark grey colour block. It is predominantly used to add a border to a project but is not limited for this use only. Charcoal can be used to create a clean contemporary look when used solely on its own.

Mellow Stone - Mellow Stone is a multi-tone colour block that has been created using a muted yellow and red colour. It is ideally suited for a traditional look but this does not restrict it from being able to create a contemporary look.

Italian Porcelain Collection

L'Altra Pietra Paving

Castacrete are delighted to offer L'Altra Pietra Paving, which is the Italian translation for 'The Other Stone'

Italian Porcelain is becoming increasing popular, due to its ability to achieve opulence in its greatest form. The porcelain incorporates natural properties that cannot help but deliver the look of luxury and splendour, regardless of the environment.

The versatility of the porcelain means it has the capabilities to create indoor or outdoor spaces of splendour which can be savoured all year round.

'The Other Stone' is hard-wearing, easy to keep clean and easy to maintain through all seasons. As a result of having practically zero water penetrability, this in turn gives it a reduced susceptibility to mould, moss, algae and salt, as well as making it frost proof.

Ardesia Black

Ardesia Grey

Ardesia

Collection

Ardesia, has been inspired by the classic antiquity of ancient Italy and created from natural slate. It can be used whether you are creating a traditional rustic feature or a clean crisp contemporary look. It provides a smooth riven finish with slight anti-slip properties. Available in two colours and one size.

Colour	Pack/Size Info	m ² Covered	KG Per Pack	Pieces Per Pack

Rainbow - The opulence of this colour creates a warm and inviting ambience with its tones of red brown and buff with the addition of natural quartzite particles to the surface that glimmer in the sun. Whether you are aiming for the more traditional look of a contemporary design, this colour is perfect for either.

Teakwood - The colour is in the name. With its base tone of muted yellows and buff and its addition of red and brown veining throughout, it cannot fail to deliver a striking impact with the resemblance of teakwood. It also has the versatility to be utilised for a traditional or contemporary finish.

Raj Sandstone - Also known as Raj Green it displays tones of warm muted grey, green, brown and plum. Raj has a slightly riven and textured face which results in a traditional organic finish to any project

Mint Sandstone - Also referred to as Fossil Mint. With its light beige and pastel tone properties, it adds a look of clean and crisp distinction. The natural riven texture to the surface and veining of a multitude of colours along with the natural and random fossil particles running throughout adds finesse and antiquity to the already flawless character.

Grey -Also known as Khandla grey, it is a solid muted grey shade. It lends itself to the more modern and contemporary look although cannot be dismissed for the more traditional rustic project. This has a slight textured riven surface, enhancing its character.

Black Limestone -Also known as Kota Black, this is a solid black shade with a riven texture to the surface. Whether you are re-creating a contemporary or monochromatic look, this will produce a stunning finish inside or out.

Raj - Also known as Raj Green it displays tones of warm muted grey, green, brown and plum. Raj has a slightly riven and textured face which results in a traditional organic finish to any project.

Mint - Also referred to as Fossil Mint. With its light beige and pastel tone properties, it adds a look of clean and crisp distinction. The natural riven texture to the surface and veining of a multitude of colours along with the natural and random fossil particles running throughout adds finesse and antiquity to the already flawless character.

Grey - Also known as Khandla grey, it is a solid muted grey shade. It lends itself to the more modern and contemporary look although cannot be dismissed for the more traditional rustic project. This has a slight textured riven surface, enhancing its character.

Mint Sawn and Honed -Also referred to as Fossil Mint. With its light beige and pastel tone properties, it adds a look of clean and crisp distinction. The honed finish with the veining of muted pastel colours running throughout adds a luxurious and majestic vision to any contemporary design.

Donegal Stone Collection

Our Donegal Stone Collection comprises
Quartzite and Irish Blue Limestone

Gold

Donegal Quartzite

Our Quartzite Paving is extremely hard-wearing and is therefore ideal for all indoor and outdoor projects, including kitchens, hallways, bathrooms and of course your dream patio and outdoor space.

The blend of colour tones of the Quartzite will give a warm feeling to any traditional or contemporary home, with the shades varying from warm golden browns to cool blue grey tones.

Donegal Quartzite has many qualities, not only its rugged beauty, and riven finish, but also because of its durability and excellent resistance to acid rain, frost & air pollution as well as its suitability to heavy trafficked areas. The paving also has a slightly gritty surface which provides excellent grip in both wet and dry conditions.

Weathered Limestone Rock

Our Weathered Limestone originates from the west coast of Ireland. It has a distinctive look with its deep channels and shallow pans, where it gathers soil. Often in these shallows, plants and grasses grow, a beautiful feature to any garden.

Monoliths

Black Slate & Sandstone Monoliths are extremely durable with variations in colours and shades.

Monoliths come in many different sizes ranging from 2 foot to 6 foot.

Monoliths are available drilled to use as a water feature or not drilled to use as a feature stone in your garden. The Monoliths are sold individually or by cage.

Rutland Pre-Packed Patterns

Oakham Pattern

Coverage: 7.2m²

Pack contains: 600mm x 600mm x 12 off and 600mm x 300mm x 16 off

Oakham Extended Pattern

4 Packs joined together: Coverage: 28.8m²

Pack contains: 600mm x 600mm x 48 off and 600mm x 300mm x 64 off. Four Oakham packs have been added together, showing how the straight lines between each pack can be broken up by turning certain slabs, shown in the darker shade.

Ashwell Pattern

Coverage: 6.08m²

Pack contains 600mm x 450mm x 15 off and 450mm x 300mm x 15 off

Ashwell Extended Pattern

4 Packs joined together: Coverage: 24.3m²

Pack contains: 450mm x 450mm x 88 off and 450mm x 225mm x 64 off. Four Ashwell packs have been added together, showing how the straight lines between each pack can be broken up by turning certain slabs, shown in the darker shade.

Ryhall Pattern

Coverage: 6.08m²

Pack contains 600mm x 450mm x 15 off and 450mm x 300mm x 15 off

Ryhall Extended Pattern

4 Packs joined together: Coverage: 24.3m²

Pack contains: 600mm x 450mm x 60 off and 450mm x 300mm x 60 off. Four Ryhall packs have been added together, showing how the straight lines between each pack can be broken up by turning certain slabs, shown in the darker shade.

7.29m² Random Pattern

2.7m x 2.7m comprising:- 600mm x 450mm x 11 off, 450mm x 450mm x 12 off, 450mm x 300mm x 14 off. Can be created using Rutland, Courtyard and Traditional Paving

9m² Hambleton Pattern

3m x 3m comprising:- 600mm x 600mm x 13 off, 600mm x 300mm x 18 off, 300mm x 300mm x 12 off. Can be created using Rutland or Courtyard Paving

4.86m² London Bond Pattern

2.7m x 1.8m comprising:- 600mm x 450mm x 9 off, 450mm x 450mm x 12 off. Can be created using Rutland, Courtyard or Traditional Paving.

10.89m² Old Dutch Pattern

3.3m x 3.3m comprising:- 600mm x 600mm x 20 off, 600mm x 300mm x 9 off, 300mm x 300mm x 22 off. Can be created using Rutland or Courtyard Paving

29.16m² Large area Random Pattern

5.4m x 5.4m comprising:- 600mm x 600mm, 600mm x 300mm and 300mm x 300mm x 12 off. Can be created using Rutland or Courtyard Paving.

3.65m² Random Pattern

2.7m x 1.35m comprising:- 600mm x 450mm x 6 off, 450mm x 450mm x 6 off and 450mm x 300mm x 6 off. Can be created using Rutland, Courtyard or Traditional Paving.

Natural Stone Laying Patterns

11.52m² Sawn Sandstone Pattern

11.52m² pack comprises:- 600mm x 600mm x 16 off, 600mm x 300mm x 26 off and 300mm x 300mm x 12 off.

14.85m²/15.25m² Natural Stone Patio Packs

15.25m² pack comprises:- 900mm x 600mm x 13 off, 600mm x 600mm x 13 off, 600mm x 290mm x 13 off and 290mm x 290mm x 9 off. Available in Tumbled Collection, Calibrated Sandstone Collection and Calibrated Limestone Collection. 14.85m² pack comprises:- 900mm x 600mm x 13 off, 600mm x 600mm x 13 off, 600mm x 295mm x 13 off and 295mm x 295mm x 9 off. Available in Sawn Edge Collection and Granite Collection.

15.39m² Slate Pack

15.25m² pack consists :- 600mm x 600mm x 24, 600mm x 300mm x 25 and 300mm x 300mm x 25

20.43m² Thin Sandstone Pack

20.43m² pack consists :- 900mm x 600mm x 18, 600mm x 600mm x 17 and 600mm x 290mm x 25 and 290mm x 290mm x 11

11.25m² Contemporary Stone Pack

11.25m² pack comprises:- 775mm x 450mm x 10 off, 675mm x 450mm x 10 off and 575mm x 450mm x 10 off.

More Laying Patterns

15.25m² pack comprises:- 900mm x 600mm x 13 off, 600mm x 600mm x 13 off, 600mm x 290mm x 13 off and 290mm x 290mm x 9 off.

Available in Tumbled Collection, Calibrated Sandstone Collection and Calibrated Limestone Collection.

14.85m² pack comprises:- 900mm x 600mm x 13 off, 600mm x 600mm x 13 off, 600mm x 295mm x 13 off and 295mm x 295mm x 9 off.

Available in Sawn Edge Collection and Granite Collection.

NB. All Drawings are no to scale.

Guidance and Tips

Product Guide Manufactured and Natural Stone Paving

Choosing to have a new patio or paved area installed is a long term investment and needs careful planning. All Castacrete paving products need correct installation, protection and maintenance to help retain their natural character and beauty and the long-term integrity of the area.

The following is a guide only, which is applicable to both manufactured and natural stone paving. We would recommend you seek advice from a professional contractor.

Choosing your paving

Be sure that the product you have chosen is suitable for the project you are planning before ordering and more importantly before laying of the paving has commenced.

Ordering your paving

Check quantities required and then check again. Order all materials to complete your project at the same time. To avoid delays to your project once it is underway, do not start work until you are sure all materials you require are with your supplier. NB: All sizing is nominal sizes (imperial sizes where quoted are approx.).

Laying the paving

TIPS AND SUGGESTIONS FOR LAYING BOTH MANUFACTURED CONCRETE AND NATURAL STONE PAVING PRODUCTS. This is not a comprehensive step by step guide, we recommend you always seek professional advice.

The paving you have chosen should be seen as the 'top dressing' to your patio, but the key to achieving the visual result that enhances your garden is to get the preparation, installation and finishing correct. This will ensure that your new paved area will give you many years of use and pleasure. Choose products and methods suitable for your project, non-professionals should seek advice.

Preparation and Drainage

Always allow sufficient drainage when siting the patio and in preparation of the base. Poor drainage may lead to water retention which could affect the weathering and performance of the paved area.

- Drain away from the house, wherever possible. If the design of the area does not allow this, then drainage channels along the length of the property must be installed.
- Paving should be laid with a fall of 1:80.
- Surface level of the paving should be two courses below the Damp Proof Course of the property.

Laying

- All flags need to be laid on a full mortar bed, with no gaps or voids beneath.
- Do not "Dot & Dab" any stone or concrete product.
- Mortar to be mixed to the ratio of 5:1 sharp sand and Cement. Light coloured paving could suffer from discolouration, so we would recommend a silver sand and white cement.
- Full mortar bed to be a 35mm-55mm depth.
- Check levels constantly while you work.
- BEWARE Natural stone is laid with the narrowest surface facing the ground, making an inverted 'V' joint.
- When laying Natural Stone, the jointing gap will typically be 10mm measured at the upper face, depending on the laying pattern selected and the finish on the flags edge.
- On concrete paving, the gap between slabs should be sufficient enough to allow a key for the jointing mix. NB: Some manufactured paving has a sloping side, making a 'V' joint. The base of these slabs must not be touching.
- There are many different ways to joint your paving. Using a building sand and cement mix to the ratio of 3:1 is the traditional technique. There are a number of resin/polymeric based brush in products on the market that are just as effective. Castacrete recommends Azpects Easy Joint All Weather Jointing Compound.

Cutting

Avoid cutting concrete paving wherever possible. If absolutely necessary, it is advised that the slab is cut with an angle grinder and diamond cutting blade. Always try to cut in a straight line and avoid cutting angles.

Characteristics of Manufactured Paving

Our Concrete paving products are designed for decorative use and enjoyed in a domestic garden environment. They are subjected to all extremities of weather and general wear and tear. Concrete is a natural material and it will react with its environment. The reactions seen, particularly on a newly laid concrete patio area, will not be detrimental to the long term use if the paving has been used in an appropriate manner. The following are some points to be aware of:-

Dark Patches

Darker or lighter areas, often appearing in the centre of the paving slab, but can also be seen as uneven patches over the whole surface. The occurrence of this chemical reaction is determined by environmental conditions, such as the amount of the shade or sunlight the area receives, or dampness from surrounding areas, rainfall frequency etc., Their appearance is therefore spasmodic, unpredictable and unavoidable. They will weather out as the slab dries naturally and incidences will reduce as the paving matures in its environment. If a blemish free area is required, alternative materials may need to be considered.

Surface Marks

Scratches or scuff marks on the surface caused in storage and in transit. Surface blemishes caused in transit cannot be avoided and do not affect the long term performance of the concrete. These will fade and weather through normal use.

Stains

Clean accidental stains immediately with a proprietary cleaner specifically formulated for the job and following the manufacturer's instructions for use. Very rarely some Natural Stones and the natural aggregates used in concrete manufacture contain small particles of iron or lignite. When exposed, the iron oxidises and the lignite may cause a reddish brown stain. Clean with a product specially formulated for rust or lignite removal. Some weed killers and grass treatments contain chemicals that stain concrete and stone. If they come into contact with the paving, clean immediately (see below MAINTENANCE). A choice of specialist concrete cleaners is available through builders merchants and good DIY outlets.

De-Icing

Do not use any form of salt, especially rock salt to de-ice paving. This may cause immediate and irreparable damage and regular application of salts will undoubtedly cause long term breakdown of the concrete. NB: Castacrete wet cast concrete paving products are designed for domestic use only and whilst they are fit for purpose under normal weather conditions, they cannot be guaranteed for use in areas which regularly experience prolonged dampness or occasional temperatures of below -15°C.

Maintenance

To keep your patio in its best condition, regularly sweep and clean normal garden debris immediately to prevent staining. DO NOT use harsh acid base chemical cleaners or power washers to clean decorative paving. Sufficient cleaning can be achieved by the occasional wash with mild soapy water and thorough rinsing.

Guidance and Tips

Characteristics Of Natural Stone Paving

Finish and Sizing

As part of the production process, natural stone will contain blemishes, veining, small chipping and small holes. All of which are natural characteristics of the stone. Most chips will not be visible once installed and pointed. Order an extra 10% for wastage, cuts and pieces that you may not wish to use.

All Natural Stone varies in colour, texture, markings and touch. These variations are what give natural stone its uniqueness and add to its appeal. Small samples will not always give an accurate reflection of how the patio will look once finished. Therefore, we recommend you visit one of our stockists who will be more than happy to advise you. These variations are accepted as unavoidable within the landscaping industry. Natural Stone will have a dimension tolerance of +/- 5mm.

Colour Variations

All natural stone contains a variation in colour, veining, shading, may contain blemishes and other natural characteristics. These are all perfectly normal and not a sign of any fault in the product. Natural shade variations need to be evenly distributed across the paved area. If multi packs are ordered, open and sort all crates so a good colour mix can be achieved. Grey Sandstone contains natural iron and this may oxidise and show as brown markings. This is inherent in the stone and should not be seen as a fault. Black Limestone may lighten as a result of natural light and weathering.

Please contact your stockist or speak with a professional contractor for advice. Castacrete cannot be held responsible or accept liability for natural characteristics within the stone.

Sealing and Aftercare

Not all Natural Stone needs to be sealed. Sealants will often change the look of the paved area and it is the owner's choice whether to do this. We suggest you take the advice of your installer. If the decision is taken to seal we advise that the area should be clean and perfectly dry before the commencement of sealing. Use an impregnator that will penetrate deep into the stone. This will inhibit water and oil passing through the surface and help prevent staining. Always follow the manufacturer's installation advice on any product applied to our products. Regularly clean with a light jet wash each season and use a market leading brand of chemical stone cleaner to keep your stone looking brand new. DO NOT use acid based cleaners.

5 TOP TIPS

1. Prepare and plan
2. Always use a full mortar bed when laying the flags. Point all choices of paving.
3. When using multiple packs, open all packs and randomly select flags from each pack to blend colour variances.
4. DO NOT use acid based cleaners on any of our products. These will severely damage your paving. Use a mild detergent instead.
5. Visit your local stockist to view the paving. Brochure prints will not always give accurate colour variations.

Points to be aware of before using our paving products

- Please check suitability of the product before purchasing and laying.
- Order all materials to complete your project at the same time.
- If using more than one pack, please ensure that you lay the product at random from all packs to minimize any unavoidable shade variations.
- No claims can be entertained once the product has been laid.
- Castacrete recommend that block paving is laid by either a professional contractor or those experienced in DIY.

Health and Safety

- Store packs on level/even ground
- Open packs at ground level
- Stand to one side when removing strapping and wrapping
- Support leaning slabs as necessary.

Disclaimers

Castacrete Limited Concrete Products are made from high quality aggregates, cement and inorganic pigments and are specifically designed for domestic use. We are continually improving the quality and service we provide, therefore, information may be subject to change without prior notice. Although we take every care that the information given in our brochures or on our website is accurate and up to date, no liability of any kind (including liability for negligence) will be attached to the company or their representatives. Colours and finish of products shown in this brochure are as accurate as the printing process will allow, but we strongly advise that you view the actual product before purchase. All sizing is nominal (imperial sizes where quoted are approximate). No responsibility is accepted for use of the product other than that intended by the manufacturer. Please note that the products shown in this brochure does not guarantee availability. Although not affecting your statutory rights, please note that the company cannot accept liability in respect of any costs incurred as a result of uplifting and relaying defective product, if, upon inspection it is proven that the defect ought to have been evident prior to laying. Products, sizes and quantities are correct at the time of printing.

Efflorescence

The Castacrete Group of Companies cannot accept any liability for the temporary effects of the natural phenomenon of efflorescence. This can occur in both concrete products with a high cement content and some types of Natural Stone. This white powdery like substance is extremely common on both un-laid and laid concrete products. It ranges from a mild bloom which gives the appearance of colour loss to large white blotches on the surface. Its appearance can be very spasmodic and unpredictable, but is not detrimental to the performance of the concrete. It can also show itself as streaks or a mottled or spotted effect. Although most commonly associated with concrete paving products, efflorescence can also affect natural stone when it is laid on a full mortar bed. Limestone products can be particularly susceptible. This is a temporary phenomenon caused by the chemical reaction between water and cement, which will weather out naturally and does not damage the paving. There are many efflorescence removers available for purchase on the market, but we recommend it is left to weather out naturally to avoid any damage to the surface of the paving. Efflorescence is not a fault of the manufactured or natural stone.

Porcelain Laying Information

There are two commonly suggested and recommended methods of laying external porcelain tiles.

1. On a Full Wet Bed

With this method, the porcelain tiles are placed onto a levelled bed of either 4:1 or 6:1 sand and cement mortar bed, prepared to a wet consistency. This mortar should be placed over a prepared sub-base of compress MOT Type 1 material, usually at 75mm-100mm thickness. Use a bond bridge primer on the underside of every flag stone before laying. This will ensure a superior bond to the wet bed. The bond bridge can be made using liquid SBR and OPC cement.

2. On a Thin Bed

This method is similar to laying internal floor tiles inside a property. The porcelain tiles are fixed to a 75mm-100mm concrete slab base, using an external grade tile adhesive. Again, use a bond bridge primer underneath the tiles to ensure a superior bond. For jointing, there is an option of using a narrow joint, two-part epoxy resin that is available to purchase on the market. This will give you a quick and clean finish. We would recommend you seek advice from a professional contractor regarding installation and finishing of porcelain tiles. NB: Castacrete Limited does not offer a garden design or advisory service for laying paving.
