

Rutland and Courtyard Pre-packed Paving – Oakham pattern

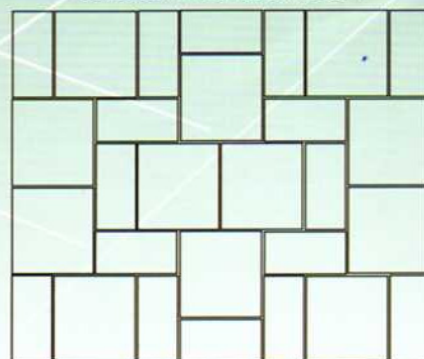

A practical alternative to natural stone

- Each slab has been specifically designed to recreate Natural Stone.
- Handy pack size of just 7.2 square metres (12 - 600x600mm and 16 - 600x300mm).
- Benefits from paving having a consistent thickness.
- Lightweight, with each 600mmx600mm slab weighing a maximum of 25Kg to comply with the current EU regulations on single person handling.
- Each pack creates an attractive random pattern (as illustrated) which can easily be linked together to extend to any size area.
- Alternatively create your own design with these easy to use module sizes.

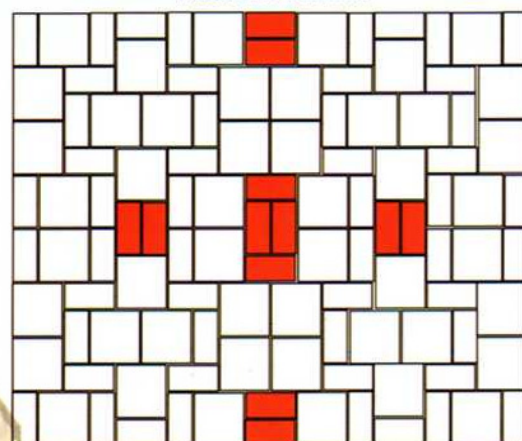

Build & Match

By turning the 600mmx300mm slabs 90° (as shown in orange) any size area can be achieved whilst maintaining a pleasing random effect
